

YLAD Living Soils *Putting life back into the land*

2022 Seeding Program

THIS IS A GUIDE ONLY

Pre-Plant (Broadcast Fertiliser Blends)

		Rate per hectare
YLAD Humus Compost	YLAD Humus Compost adds humus, minerals & microbiology to the soil creating the ideal soil environment for seedling germination, root development and plant vigour.	500 Kg - 1 t
YLAD Compost Mineral Blend	Minerals are added to Humus Compost and remain available for plant uptake with reduced leaching or locking up as per soil test.	1 - 1.5 t
Lime Plus	Lime Plus is a homogenous blend of calcium and other macro-nutrients, chelated trace elements and soil microbes, stabilised in humus designed to balance soils.	710 Kg/Ha

Seed Dressing

		Litres Per tonne seed
Seed Start	A fusion of essential minerals to improve seedling germination, promote early vigour and improve plant health.	5
BAM	Multipurpose blend of anaerobic species.	5

Down-the-Tube Granular Sowing Blends

Germinate	Germinate is a granular fertiliser for cereal sowing, a microbe friendly, carbon based blend, supplying soluble and slow release nutrients to improve soil, root, and plant dynamics for greater yields and quality. Benefits include reduced leaching and lock up, less fertiliser root burn associated with all acid based fertilisers and the development of greater root mass and 'dreadlock' roots. Typical Analysis in units: N 4.4; P 11.2; S 1.08; Ca 5; Zn 1.46; B 1.55; Humic Acid 2.8	69 Kg/Ha
Germinate Plus	Germinate Plus is a granular down the tube fertiliser for canola and grazing crops sowing. Germinate Plus™ contains more nitrogen and sulphur in a buffered form to ensure quick germinate and early plant growth. A microbe friendly, carbon based blend, supplying soluble and slow release nutrients to improve soil, root, and plant dynamics for greater yields and quality. Benefits include reduced leaching and lock up, less fertiliser root burn associated with all acid based fertilisers and the development of greater root mass and 'dreadlock' roots. Typical Analysis in units: N 12.4; P 11.2; S 10.68; Ca 5; Zn 1.46; B 1.55; Humic Acid 2.8	109 Kg/Ha
Legume Plus	Legume Plus is a granular down the tube fertiliser ideal for sowing lupins, lucerne, pastures and clover or any crop symbiotic with rhizobium. Legume Plus contains more calcium than any other of our other blends to ensure excellent nodulation and active nitrogen fixing. A microbe friendly, carbon based blend supply large amounts of slow release nutrients to encourage active root growth. Typical Analysis in units: N - 2.2, P - 4.4, S - 14.94, Ca - 15, Zn - .83, B - 1.55, Humic Acid - 2.8	87 Kg/Ha

Liquid Injection

		Rate per hectare
YLAD Humus Extract Tea with Kelp	Extracted compost tea containing humic acid, minerals, microbes, fish, molasses & kelp.	50-100 litres
OCC-R	Significantly enhance the efficacy of active compounds in an aqueous environment.	1:10000
Myco-Gro	Myco-Gro Inoculant contains VA Mycorrhiza fungi that grow as minute filaments.	50 gm/Ha

Prescription Made Blends

The blends shown on main page are a guide as to what we have available, however YLAD Living Soils do offer a tailor made Down the Tube blend based on:

1. Your soil test results
2. Farm Enterprise Mix
3. Budget
