Human Health

Description

What is Bio-Bubble GS™?

Bio-Bubble GS™ is a refreshing new lime and mint flavoured version of our probiotic powerhouse. Would you like to dramatically boost your digestion and gain greater access to the nutrients in your food? Health begins in the digestive tract where 100 billion organisms nourish, protect, support and energise their host.

Benefits

Contains food-derived minerals, vitamins, fatty acids and antioxidants, all in biologically digested form.

Also includes free amino acids, enzymes and billions of beneficial gut organisms.

Bio-Bubble GS™ is an alkalising essential to improve your critical acid/alkaline balance.

These living organisms provide a rapid response, as the activation time required with 'dormant' probiotics is not applicable.

This enzyme-rich, lacto-fermented food serves to replenish your enzyme 'bank account'.

Recommended Usage

50 to 150 mL per serve (per day).

If stomach discomfort occurs, try 20 mL and slowly build up.

Ingredients

Fermented with Natural Organic Lactobacillus Bacteria and Symbiotic Yeasts.

Agave, Organic Honey, Fresh Mint, Organic Fresh Ginger, Fresh Lime Juice, Mung Beans, Brown Rice, Lentils, Chick Peas, Linseed, Alfalfa Seed, Millet, Quinoa, Ionic Minerals, Filtered Water Added.
