

Stubble Management

Stubble Management

What are the Benefits?

- Fungi break stubble down faster and use less nitrogen than bacteria.
- Retain nitrogen for next years crop.
- Fungi contribute to soil organic carbon, soil structure, and water infiltration.
- Improved stock performance - ewes and lambs will hold and improve condition grazing on treated stubble.

Management 1 - per ha 15 litres UAN
 5 litres Molasses
 1kg Super Soluble Humate Granules
 80 litres water

Management 2 - per ha 10 litres BAM
 10 litres Molasses
 80 litres water

Management 3 - per ha 15 litres UAN
 5 litres Molasses
 Trichoshield 500 gms
 1kg Super Soluble Humate Granules
 80 litres water

Application time: immediately after harvest to capture the volatiles. Stubble should be laid on the ground
