YLAD Humus Compost®

Soil Balancing

Cropping

Pasture & Animal

Foliar & Fertigation

A Naturally Balanced Living Fertiliser

The most valuable active carbon fertiliser in agriculture today having a powerful impact on soil fertility and production.

Description

The value of YLAD Humus Compost® comes from its ability to restore and expand biological activity in the soil while further enhancing the physical and chemical properties.

Benefits

- Soils become soft, aggregated and sweet smelling
- Builds soil organic carbon levels
- Supplies balanced minerals, microbes and humic and fulvic acids
- Produces massive plant root development
- Humus has the greatest magnetic attraction to minerals known to man – less nutrient leaching and nutrient lockup
- Improves nutrient holding capacity and enhances recycling of nutrients
- Increases water holding capacity
- Improves diversity and ratio of beneficial soil microbes
- Assists with unlocking of tied up minerals
- Increases shelf life and quality of product

Packaging

Available in the following volumes:

- 25 kg
- 1 Tonne Bulk Bag
- Bulk

Application Rates

Application	Rate
Dryland Cropping	500 – 1000 kg/ha
Pasture Establishment	500 – 750 kg/ha
Pasture Maintenance	300 – 500 kg/ha
Horticulture/Viticulture	2000 – 4000 kg/ha
Turf & Vegetables	1000 – 2000 kg/ha
Garden & Lawns	4 kg per meter sq

Procedure

- Apply with a belt spreader
- Apply one month prior to planting
- Can be applied as a top dressing to crops, trees and pasture
- No need for incorporation

Dry Weight Typical Analysis*

*Subject to Batch Variation

Nitrogen (N)	1.3%
Phosphorus (P)	1.4%
Potassium (K)	1 %
Sulphur (S)	.26%
Calcium (Ca)	3.87%
Magnesium (Mg)	.63%
Silica (Si)	863 ppm
Zinc (Zn)	2kg/tonne
Copper (Cu)	.5 kg/tonne
Boron (B)	.5 kg/tonne

Active Living Soil

Properties

- pH 7.2 - 7.5
- Particle Size 1-5mm
- Moisture 27%
- Nil: e-coli, salmonella & sulphides
- Humic Ions 60 (ideal 50-80)
